NIHAL MV

MERN STACK DEVELOPER | FRONTEND DEVELOPER

Kerala, India | Email: nihalmv2004@gmail.com | GitHub: github.com/nihalmv-ops | LinkedIn: linkedin.com/in/nihal-mv-dev

PROFESSIONAL SUMMARY

Motivated and detail-oriented MERN Stack Developer with practical experience building responsive, user-friendly, and modern web applications using React.js, JavaScript, Tailwind CSS, Node.js, Express.js, and MongoDB. Proven track record delivering functional full-stack projects including supermarket retail POS applications, e-commerce storefronts, and travel platforms. Actively seeking opportunities as a React Developer, Frontend Developer, or MERN Stack Developer.

TECHNICAL SKILLS

Frontend: React.js, JavaScript (ES6+), HTML5, CSS3, Tailwind CSS, Vite, Responsive Design
Backend & APIs: Node.js, Express.js, RESTful APIs, JSON
Database: MongoDB, MongoDB Atlas, Mongoose
Tools & Platforms: Git, GitHub, VS Code, Postman, Vercel, npm
Core Strengths: Component-Based Architecture, UI Usability, Problem Solving, Continuous Learning

FEATURED PROJECTS

SmartMart AI — Supermarket Management & Billing System

(Live: smartsh-ai-hrkd.vercel.app)

Technologies: React.js, JavaScript, Node.js, Express.js, MongoDB | github.com/nihalmv-ops/smartshAI

- Developed a supermarket management and billing application focused on streamlining retail operations.
- Built a responsive user interface using React.js.
- Worked on backend API integration and database connectivity.
- Prepared the application for online deployment.

TrachMart E-Commerce — TechNest Laptops & Mobiles

(Live: trachmartshop.vercel.app)

Technologies: React.js, JavaScript, Vite, Tailwind CSS | github.com/nihalmv-ops/trachmartshop

- Developed a responsive e-commerce website for browsing laptops, mobile phones, and other technology products.
- Built reusable React components and responsive user interface elements.
- Implemented client-side navigation and interactive shopping features.
- Focused on responsive design and usability across desktop and mobile devices.

GoTravel — Responsive Travel Website

(Live: rgotravel.vercel.app)

Technologies: React.js, JavaScript, Tailwind CSS, HTML5, CSS3 | github.com/nihalmv-ops/rgotravel

- Developed a responsive travel website using React.js and modern frontend technologies.
- Created reusable UI components and responsive layouts for desktop and mobile devices.
- Implemented interactive user interface elements with a focus on usability and visual consistency.
- Published the application online using Vercel.

EDUCATION

Bachelor of Computer Applications (BCA)

2023 – 2026

Undergraduate Degree Program | Kerala, India

Coursework & Foundation: Data Structures, Web Development, Object-Oriented Programming, Database Management Systems (DBMS), Operating Systems, and Software Engineering Principles.

SELF-DIRECTED LEARNING & DEVELOPMENT

- Full Stack JavaScript Development: Hands-on implementation of MERN architecture, asynchronous programming, and REST APIs.
- Version Control & Collaboration: Proficient with Git workflows, branch management, code reviews, and GitHub repositories.
- Web Accessibility & Modern Web: Practicing semantic markup, responsive design principles, and Core Web Vitals.
