NIHAL MV

MERN STACK DEVELOPER | FRONTEND DEVELOPER

Kerala, India | Email: nihalmv2004@gmail.com | GitHub: github.com/nihalmv-ops | LinkedIn: linkedin.com/in/nihal-mv-dev

PROFESSIONAL SUMMARY

Passionate and motivated MERN Stack Developer with strong foundations in React.js, JavaScript, Node.js, Express.js, and MongoDB. Experienced in developing responsive, accessible, and user-friendly web applications with clean component architecture and modern UI standards. Eager to contribute technical skills and collaborative problem-solving to a dynamic development team as a React / Frontend / MERN Stack Developer.

TECHNICAL SKILLS

Frontend: React.js, JavaScript (ES6+), HTML5, CSS3, Tailwind CSS, Responsive Design, Context API
Backend: Node.js, Express.js, RESTful APIs, JSON
Database: MongoDB, MongoDB Atlas, Mongoose
Developer Tools: Git, GitHub, VS Code, Postman, Vercel, npm
Core Strengths: Component-Based Architecture, UI/UX Implementation, Problem Solving, Continuous Learning

KEY PROJECTS

TrachMart E-Commerce | React, JavaScript, Tailwind CSS, Context API (Live: trachmartshop.vercel.app)

- Architected a modern e-commerce storefront with intuitive product catalog navigation, dynamic product cards, and responsive layouts.
- Implemented shopping cart state management with Context API, supporting item addition, quantity adjustments, and pricing calculations.
- Designed a mobile-first, ATS and SEO-friendly interface utilizing Tailwind CSS utility classes and semantic HTML5.

Budget Insights & Expense Tracker | React, JavaScript, Tailwind CSS, Chart.js (github.com/nihalmv-ops)

- Developed a personal finance and budgeting dashboard to track income, expense streams, and categorizations in real-time.
- Integrated visual data representations with modern charting libraries to offer users clear monthly budget breakdowns and spending trends.
- Ensured modular, maintainable code structure with custom React hooks and validated input forms for financial records.

SmartMart AI | React, Node.js, Express.js, MongoDB (github.com/nihalmv-ops/smartshAI)

- Engineered a supermarket management and billing application engineered for seamless point-of-sale (POS) and inventory workflows.
- Implemented backend REST endpoints using Node.js and Express to manage product catalogs, inventory updates, and transactions.
- Designed schema structures with MongoDB to record store sales and support rapid product search and invoice tracking.

EDUCATION

Bachelor of Computer Applications (BCA) **2023 – 2026**
Undergraduate Degree Program | Kerala, India

Coursework & Foundation: Data Structures, Web Development, Object-Oriented Programming, Database Management Systems (DBMS), Operating Systems, and Software Engineering Principles.

SELF-DIRECTED LEARNING & DEVELOPMENT

- Full Stack JavaScript Development: Hands-on implementation of MERN architecture, asynchronous programming, and REST APIs.
- Version Control & Collaboration: Proficient with Git workflows, branch management, code reviews, and GitHub repositories.
- Web Accessibility & Modern Web: Practicing semantic markup, responsive design principles, and Core Web Vitals.
